

## **APPENDIX A:**

### **SYSTEM PROCESS FLOW FOR JOB SEEKERS**

**STEP 1.** Welcome & Introduction to Site/System (Screen 1)

**STEP 2.** Overview of Process & Methodology (Screen 2)

**STEP 3.** Illustration/Tutorial (Screen 3)

**STEP 4.** User Registration & Initial Payment Process (Screen 4)

(User inputs contact information such as name, address, telephone, email, and credit card information and chooses username & password. Payment not yet authorized.)

System proceeds to Step 5.

**STEP 5. Screens 5 -12** are presented.

User inputs requested information for most recent/current relevant position including but not limited to: Job Function Type, Hierarchical Level of Function, Years in Function, Reporting Relationships, Compensation, Name of Company, Name of Division, Enterprise Type, Industry and Market Type, Company Size (revenue/sales) and Location. (If user cannot find an exact match within any menu supplied, user is instructed to select closest match or Show Me More Options button.)

**STEP 5A.** In one embodiment, system is linked to information in client server database and/or a third party database capable of providing information including but not limited to industry and company information, profiles and other relevant data. If system/client server and/or third party database recognizes company/division name, then information including but not limited to enterprise type, industry classification & size, mailing, web addresses and telephone number is automatically generated for the user.

**STEP 5B.** If system does not recognize entry (including but not limited to in the event the system is NOT linked to an information provider [the system's own or a

00000000-01502

third party's,] user completes all requested information to the best of their ability. (If user cannot find an exact match within any menu supplied, user is instructed to select closest match.)

Upon completion of requested information, user proceeds to Step 6.

**STEP 6.** System asks if there are any previous positions the user would like to include in the process.

**STEP 6-A.** If yes, user is presented again with **Screens 5 – 12** for completion regarding previously held relevant positions. Screens 5 – 12 and/or equivalent are presented for each relevant previous position held until user has finished inputting information for all previous relevant positions. Upon completion, user proceeds to Step 7.

**STEP 6-B.** If user has no previous relevant previous positions to include, user proceeds to Step 7.

**STEP 7.** System presents **Screen 13 - 15** requesting information regarding user position preferences including but not limited to: industry, function and hierarchical level. Upon completion, system proceeds to STEP 8.

**STEP 8.** System produces a request for payment and payment authorization process takes place. Upon approval, system proceeds to STEP 9.

**STEP 9.** System consults client server database and processes data from STEPS 5 – 15 using system rules and algorithm structure. System proceeds to STEP 10.

**STEP 10.** System produces a **Screen 16** consisting of a chart listing relevant industries to which the user's profile logically transfers and matches specified preferences. Each industry is accompanied by a 0, 1, 2 or 3 transferability rating indicating least (0) to greatest (3) transfer potential. (If user specifies industry preferences, those industries and their ratings are highlighted in the chart.) To see an explanation of the reasons for an industry transferability rating, the user clicks on the industry rating and **Screen 17** appears outlining the reasons for the

transferability rating. A multi-page analysis of transferability ratings across multiple industries is available to the user. To access this the user selects all or some of the industries listed and the system produces **Screen 18**.

System proceeds to STEP 11.

**STEP 11.** System automatically saves information in chart (**Screen 16**) and corresponding analyses (**Screens 17 & 18**) to a file stored on client server under the user's ID. User is prompted to manually save list to their computer, a floppy disc or other storage device/instrument/medium including but not limited to CD-ROM.) System proceeds to STEP 12.

**STEP 12-A.** User has the option to end the process at this point in which case the system's end product includes but is not limited to a chart mapping their experience's industry transfer potential and an accompanying multi-page analysis of results. If the user opts to end the process, the system proceeds to Step 40.

**STEP 12-B.** User also has the option to continue the process and purchase additional information and services including a mail-merge file/database with the names, location and web addresses of all industry member companies that represent user profile appropriate job search targets. If user elects to continue, user proceeds to STEP 13.

**STEP 13.** User is presented with **Screen 16** again and is instructed to select the most personally desirable (can be any number, from none to all) of the industry options listed in order to generate a preliminary list of companies.

**Step 13-A** User is given the option to access additional information regarding any listed industry including but not limited to industry profiles and industry leading companies.

(In one embodiment, the system is linked to a third party database capable of providing such information. In another embodiment, client server database contains and is capable of providing such information.)

In one method user chooses a listing (e.g. by clicking or right clicking on it) and is led to further information including but not limited to industry profiles. User

moves back and forth between the list and the client server or third party database information until finished with the research and selection process.

**Step 13-B.** Or, in another method, the user can select any listing (e.g. by clicking and/or left clicking on it) for inclusion in a list of industries that will subsequently be broken out by specific company members in Step 15.

When user is finished with the research and selection process, system proceeds to Step 14.

**STEP 14.** System consults client server database, identifies companies within industries selected. System proceeds to Step 15.

**STEP 15.** The system produces **Screen 19** consisting of information including but not limited to a list of specific companies, grouped by industry, that represent a logical employment fit and prospect for the user's profile and job search, including but not limited to location, web addresses and phone number.

System proceeds to Step 16.

**STEP 16.** System automatically saves list from Step 15 to a file stored on client server under the user's ID. User is prompted to manually save list to their computer, a floppy disc or other storage device/instrument/medium including but not limited to CD-ROM.  
System proceeds to Step 17.

**STEP 17.** From **Screen 19**, user is asked to select those companies (or whole industries) to be included in a mail merge database file. User is also offered the option of sorting companies by various criteria including but not limited to geography (e.g. city, state, zip or area code), industry rank (e.g. *Fortune* 500, *Fortune* 1000, *INC.* 500, Top Twenty, Most Admired, and/or other company ranking methodology.) See **Screen 20**.

**STEP 17A.** Right clicking on a company listing automatically includes it in a preliminary database.

**STEP 17B.** Left clicking automatically leads the user to additional information about that company including but not limited to a company description, location/address, annual report, SEC information, etc.

(In one embodiment, the system is linked to a third party database capable of providing such information. In another embodiment, client server database contains and is capable of providing such information.)

System proceeds to Step 18.

**STEP 18.** System consults client server database, identifies companies and calculates cost then proceeds to Step 19.

**STEP 19-A.** User is presented with a price quote for their approval. Upon user approval, system proceeds to Step 20.

**STEP 19-B.** If user does not approve (e.g. cost is too high, sorting limitations result in too few companies listed, etc.) user has the option to return to previous screen and modify selection. If user selects this option **Screens 19 and 20** re-appear for user modification. When modifications are complete, system repeats Step 19 and user is subsequently presented with a price quote as in Step 19-A.

Upon approval of new price quote, system proceeds to Step 20.

**STEP 20.** Payment authorization & approval process occurs. Upon payment approval, system proceeds to STEP 21.

**STEP 21.** System consults client server database and produces **Screen 21** consisting of the industry member companies selected, grouped by industry and sorting criteria, complete with company headquarters/division telephone number, mailing and web addresses.  
System proceeds to Step 22.

**STEP 22.** System automatically saves list to a file stored on client server under the user's ID. User is prompted to manually save this original list to their computer, a

floppy disc or other storage device/instrument/medium including but not limited to CD-ROM.

System proceeds to Step 23.

**Step 23.** User is presented with the choice to end the process or continue and view additional information such as company specific job postings.

In one embodiment, system is linked to third parties including but not limited to electronic job boards and company web sites such that the system also retrieves posted positions relevant to the user's stated profile and preferences, industry and company selections.

In another embodiment, the user has the option to dialogue with others who have considered and made transitions to other industries. Such dialogue can be achieved through means that include but are not limited to: chat rooms, email, news groups, Usenet, live broadcast, testimonials, among others.

**Step 23-A.** If user elects to end the process, the system proceeds to Step 26.

**Step 23-B.** If the user elects to continue, the system proceeds to Step 24.

**STEP 24.** System consults client server database, retrieves information and produces **Screen 22** which may include links to and/or job postings and/or user proceeds to a separate screen that contains but is not limited to matching job postings. In another embodiment, Screen 22 may include links to dialogue venues such as chat groups, Usenet, listserv, etc.

System proceeds to Step 25.

**STEP 25.** System automatically saves information from Step 24/Screen 22 to system server under user ID. User is prompted to manually save list to their computer, a floppy disc or other storage device/instrument/medium including but not limited to CD-ROM.

System proceeds to Step 26.

**Step 26.** User is presented with the choice to end the process or continue and purchase additional information regarding company and function specific hiring manager contacts.

**Step 26-A.** If they elect to end the process, the system proceeds to Step 34.

**Step 26-B.** If the user elects to continue, the system proceeds to Step 27.

**STEP 27.** Screen 22 is again presented and the user selects those companies (or whole industries) to be included in the research for a company and function specific hiring manager contact.

**STEP 27-A.** Right clicking on a company listing automatically includes it in the list.

**STEP 27-B.** Left clicking automatically leads the user to additional information about that company including but not limited to a company description, location/address, an annual report, SEC information, etc.

(In one embodiment, the system is linked to a third party database capable of providing such information. In another embodiment, client server database contains and is capable of providing such information.)

System proceeds to Step 28.

**STEP 28.** System consults client server database and produces **Screen 23**, interface for a database consisting of selected companies complete with information including but not limited to company and function specific contacts relevant to, and in a position to make hiring decisions for, the user's specified job function as well as company headquarters/division telephone number, mailing and web addresses, organized in a manner that includes but is not limited to preferences, sorting criteria, etc.

**STEP 29.** User has the option to end the process at this point in which case the system's end product includes but is not limited to the database of companies, (organized in a manner that includes but is not limited to: preferences, sorting criteria, industry, etc.) that represent logical job search targets and employment

prospects for the user's profile, complete with information including but not limited to company/industry job postings, job function specific contacts, company mailing, web addresses and appropriate telephone numbers.

**STEP 29-A.** If user elects to end the process, the system proceeds to Step 34.

**STEP 29-B.** User also has the option to continue the process and purchase additional information. If user elects to continue, system proceeds to Step 30.

**STEP 30.** Where a job function company specific contact was not available from the client server (or third party) database, user has the option to:

**STEP 30-A.** Research the contact themselves. If user selects this option, user proceeds to STEP 34.

**STEP 30-B.** Pay to have the relevant contact researched and identified. If user selects this option, user is given information regarding the research process and instructed that results will be delivered electronically, within a specified time period, and in a format that can be added to the database file. User is instructed to select relevant companies from Screen 23's company listings.

System proceeds to Step 31.

**STEP 31-A.** System calculates cost to research contacts for selected companies and produces a price quote. Upon user approval, system proceeds to STEP 32.

**STEP 31-B.** If user does not approve, user has the option to return to Step 30-B to modify selection. When modifications are complete, system proceeds to and repeats Step 31-A and user is subsequently presented with a modified price quote. Upon approval of new price quote, system proceeds to Step 32.

**STEP 32.** System processes payment authorization and, upon approval, proceeds to STEP 33.

**STEP 33.** System sends information to client server. Client server processes selections dispatching them for further research.

09002002.01502

(In one embodiment, the system is linked to third parties, electronic and non-electronic, that provide such research. Potential third party research companies include but are not limited to: electronic publishers, Dialog, Dow Jones Factiva, FIND SVP, specialized research firms, etc.)

System proceeds to Step 34.

**STEP 34.** System presents user with the option to purchase a mailing list of relevant recruiters and electronic job and resume boards based upon previously input experience profile, industry and company selections.

(In one embodiment, the system is linked to third party database(s) capable of providing, among other information, (electronic and non-electronic) mailing lists of recruiters, search firms, job and resume posting sites, indexed in a manner that includes but is not limited to functional and industry specialization. In another embodiment, the system's client server database contains and is capable of providing such information.)

**STEP 34-A.** If user selects this option, the system proceeds to STEP 35.

**STEP 34-B.** If user does not select this option, user proceeds to STEP 37.

**STEP 35-A.** System consults client server, retrieves relevant data, calculates cost and produces an output screen with a price quote for user approval. If user approves, system proceeds to STEP 36.

**STEP 35-B.** If user does not approve, user is presented with **Screen 24** enabling them to modify output by limiting selected specializations, level, geography, etc. When finished, Step 35A re-occurs producing modified price quote.

Upon user approval, system proceeds to Step 36.

**STEP 36.** Payment authorization and approval takes place. Upon approval, system proceeds to Step 37.

**STEP 37.** System produces **Screen 25** consisting of a list of all selected companies with information including but not limited to appropriate job function contacts, mailing, web addresses and telephone numbers and organized in a manner that includes but is not limited to industry and selected sorting criteria. If previously purchased/selected **Screen 25** also includes relevant job postings, recruiters, job & resume boards complete with information including but not limited to appropriate contact, mailing, web addresses and telephone numbers.

System proceeds to Step 38.

**STEP 38.** System automatically saves list to a file stored on client server under the user's ID. User is prompted to manually save and down-load final list/database in mail-merge-able database file to their computer, a floppy disc or other on- or off-line storage medium/device including but not limited to CD-ROM.

System proceeds to Step 39.

**STEP 39.** System informs user that they have completed the Right Options process (**Screen 26.**) System proceeds to Step 40 and Post Process Feedback.

**STEP 40. Immediate Post Process Feedback**

System presents **Screen 49** asking for information including but not limited to:

Problems and or frustrations encountered by the user during the process;

Perceived helpfulness and value of the process and its end products;

What the user thinks the system sh/could do better?

What they think the system sh/could do differently?

The user's job search wish list;

OTHER.

System proceeds to Step 41.

**STEP 41. Short-Term Post Process Feedback**

System presents **Screen 50** asking for permission to follow-up by email and telephone in several months for the purpose of ascertaining information including but not limited to:

Perceived longer term helpfulness and value of the process and its end products;

Where the user ultimately went?

How successful was the transition?

What do the user wishes they had known before embarking on the process?

What would the user do differently next time?

What the user thinks the system sh/could do differently?

What sh/could the system have done better?

The user's job search wish list;

OTHER.

**STEP 42. The user has completed the system's process at this point.**

**The system's end-product includes but is not limited to a comprehensive database/mail merge file containing but not limited to the mailing/web addresses, telephone numbers and job function specific contacts for companies and recruiters, job and resume boards that represent logically appropriate targets for the user's job search.**

**The system's full service final product includes but is not limited to an analysis of transferability of the user's professional profile to industries other than their own as well as a database of all information necessary to execute a comprehensive job search and mailing, customized to the user's profile and specifications and targeted to those industries and companies most likely to offer optimal employment prospects and receptivity.**

09062502.01502

## **APPENDIX B:**

### **SYSTEM PROCESS FLOW FOR EMPLOYERS/RECRUITERS**

**STEP 1. Welcome & Introduction to Site/System (Screen 1)**

**STEP 2. Overview of Process & Methodology (Screen 2)**

**STEP 3. Illustration/Tutorial (Screen 3)**

**STEP 4. User Registration & Initial Payment Process (Screen 4)**

(User inputs contact information including but not limited to: name, company address, telephone, and email. User inputs credit card information and chooses username & password. Payment not yet authorized.)

**STEP 5. Screens 27 - 34 are presented.**

User inputs requested information for the position being filled including but not limited to: Job Function Type, Level of Function, Name of Employer, Name of Division (if applicable,) Enterprise Type, Industry Type, Company Size (revenue/sales,) Number of Years of Experience Required, Compensation. (If user cannot find an exact match within any menu supplied, user is instructed to select closest match.)

**STEP 5-A.** In one embodiment system is linked to client server and/or third party database capable of providing information including but not limited to: industry and company information and profiles, mailing & web addresses, function specific contacts and other relevant data. If client server database/system recognizes company/division name, then information including but not limited to enterprise type, industry classification, company/division size, function/company specific contacts, mailing and web addresses are automatically generated for the user.

**STEP 5-B.** If system does not recognize entry (including but not limited to in the event the system is NOT linked to an information provider [the system's own or a third party's,] user completes all requested information to the best of their ability. (If user cannot find an exact match within any menu supplied, user is instructed to select closest match.)

09882892.01502

Upon completion, System proceeds to STEP 6.

**STEP 6.** System presents **Screens 35 - 40** requesting information regarding user/hiring preferences including but not limited to: Industry, Job function Type, Career Track and Skill Sets.

Upon completion, system proceeds to STEP 7.

**STEP 7.** System processes payment & payment approval process takes place.

Upon payment approval, system proceeds to STEP 8.

**STEP 8.** System consults client server database and processes input data from STEPS 5 – 6. System proceeds to STEP 9.

**STEP 9.** System produces **Screen 41** consisting of a list of industries where the user is likely to find candidate prospects with the experience and skill sets specified. Each industry listing is accompanied by a 0, 1, 2 or 3 transferability rating indicating least (0) to greatest (3) transfer potential. If user specifies an industry preference, the industry and its rating are highlighted in the chart. To see an explanation of the reasons for or against transferability for a specific industry, the user clicks on the industry name/rating and **Screen 42** appears outlining the reasons for the transferability rating. A multi-page analysis of transferability across industries is available to the user. To access this the user chooses all or some of the industries listed and the system produces **Screen 43**.

System proceeds to STEP 10.

**STEP 10.** System automatically saves this list to a file stored on client server under the User's ID. User is prompted to manually save list to their computer, a floppy disc or other storage device/instrument/medium including but not limited to CD-ROM.) System proceeds to STEP 11.

00000000.01502

**STEP 11-A.** User has the option to end the process at this point. In that case, the system's end product includes but is not limited to the chart identifying industries where the user is likely to find candidates with the experience and skills sought for the position being filled. If the user opts to end the process, the system proceeds to Step 48.

**STEP 11-B.** User also has the option to continue the process and purchase additional information and services. If user elects to continue, user proceeds to STEP 12.

**STEP 12.** Screen 41 is presented again. User is instructed to select the most desirable (can be any number from none to all) of the industry options listed.

**Step 12-A** In one method, the user can select any listing (e.g. by clicking and/or left clicking on it.) This includes it in a list of industries that will be subsequently broken out by member companies. (See Step 16 below.) In one embodiment selected industries will be broken out by (including but not limited to) specific member companies and company locations, as well as industry/function-related resume posting and job matching services, relevant directories, publications, classified advertising venues, and trade shows. (See Step 16 below.)

**Step 12-B.** Or, in another method, user is given the option to access additional information regarding any listed industry not familiar to them including but not limited to industry profiles, a sample of industry leading companies, among other things. In such a method, the user chooses a listing (e.g. by clicking or right clicking on it) and is lead to further information. (In one embodiment, the system is linked to a third party database capable of providing such information. In another embodiment, the system's client server database contains and is capable of providing such information.) User moves back and forth between the list and the client server or third party database information until finished with the research and selection process.

When user is finished with the research and selection process, system proceeds to STEP 13.

**STEP 13.** User is presented with Screen 44 offering the user the option of sorting output in various ways, including but not limited to: enterprise type, size, geography (e.g. city, state, zip or area code,) and industry rank (including but not

limited to *Fortune* 500, *Fortune* 1000, *INC.* 500, Top Twenty, Most Admired, or other company ranking methodology.)

**STEP 14.** System consults client server database for information regarding selections made, calculates cost and proceeds to Step 15.

**STEP 15-A.** User is presented with a price quote for their approval. Upon user approval, system proceeds to Step 16.

**STEP 15-B.** If user does not approve (e.g. cost is too high) user has the option to return to previous screen and de-select listings thus reducing cost. If user selects this option **Screens 41 and 44** reappear for user modification. When modifications are complete, system repeats Steps 14 and 15.

Upon approval of new price quote, system proceeds to Step 16.

**STEP 16.** The system consults client server database and consequently produces **Screen 45** consisting of information including but not limited to a list of industry member companies grouped by industry, preferences and location that represent logical search targets where appropriately experienced candidates may be found.

In one embodiment, the system also provides (but is not limited to providing) listings of relevant directories, local and regional newspapers/periodicals as well as relevant trade publications along with their classified advertising rates, classified and web address contact information. Also listed are the internet resume and job posting boards pertaining to the function and industries selected as well as relevant job fairs, conferences, on- & off-line forums, and trade shows, among other things, where candidates may be found.

In another embodiment, the system is linked to relevant job and resume posting boards and retrieves all resumes appropriate to the function/industry specifications for the user's consideration.)

In another embodiment, the system is linked to an information database (such as Dow Jones News Retrieval, Knight Ridder, Thompson, Hoovers, etc.) and automatically performs a literature search that can include but is not limited to Boolean, phrase and contextual queries of such database, for purposes that include but are not limited to retrieving all information matches found for (including but not limited to): 1) executives with the function, title, industry and companies listed;

and 2) press releases and news articles relevant to the industries, functions, titles, and companies selected.)

**STEP 17.** System automatically saves file on client server under the user's ID. User is also prompted to manually save file to their computer, a floppy disc or other storage device/instrument/medium on- and/or off-line including but not limited to CD-ROM.

**STEP 18-A.** User can elect to end process here in which case the system's end-product includes but is not limited to the above mentioned information from **Screen 45** which will include but is not limited to a list of specific companies, their locations and web addresses, function and industry relevant job and resume posting boards, directories, classified advertising venues, relevant publications, job fairs, trade shows, on- & off-line forums, relevant company/industry/executive news, grouped by preferences and specifications.

If the user opts to end the process, the information process ends and the system proceeds to Step.

**STEP 18-B.** User can also elect to gain additional information in which case user proceeds to **STEP 19**.

**STEP 19.** In one embodiment, the user has the option to dialogue with other companies who have considered and done hiring from specified industries/functional areas outside of their own for purposes such as experience sharing, ascertaining benefits, pitfalls, methodologies, resources and guidance. Such dialogue can be achieved through means that include but are not limited to: chat rooms, email, news groups, Usenet, live broadcast, testimonials, among others. If user elects this option, a new screen will be presented detailing the process from there and user proceeds to that to-be-determined Step and Screen.)

**STEP 20.** User is presented again with **Screen 45** and offered the option of consulting the system for available function specific contacts within selected industries/companies. User selects companies/industries. System proceeds to **Step 21**.

**STEP 21.** System consults client server database for information regarding selections made, calculates cost and proceeds to Step 22.

**STEP 22-A.** User is presented with a price quote for their approval. Upon user approval, system proceeds to Step 23.

**STEP 22-B.** If user does not approve (e.g. cost is too high) user has the option to return to previous screen and de-select listings thus reducing cost. If user selects this option **Screen 45** re-appears for user modification. When modifications are complete, system repeats Steps 21 and 22-A.

Upon approval of new price quote, system proceeds to Step 23.

**STEP 23.** The system consults client server database and consequently produces **Screen 46** consisting of information including but not limited to a list of industry member companies, complete with function specific contacts, grouped by industry, preferences and location.

**STEP 24-A.** User can elect to end process here in which case the system's end-product includes but is not limited to the above mentioned information from **Screen 46** including but not limited to a list of specific companies, their locations and web addresses, function specific contacts, function and industry relevant job and resume posting boards, directories, classified advertising venues, relevant publications, job fairs, trade shows, on- & off-line forums, relevant company/industry/executive news groups, organized according to preferences and specifications.

If the user opts to end the process, the information process ends and the system proceeds to Step 32.

**STEP 24-B.** User can also elect to gain additional information in which case user proceeds to STEP 25.

**STEP 25.** Where a company's job function specific contacts were not available from the client server (or third party) database, user has the option to:

1. Research the contact themselves; or
2. Pay for research and identification of the relevant contacts

**STEP 25-A.** If user selects option 1, system proceeds to STEP 28.

**STEP 25-B.** If user selects option 2, user is presented again with Screen 46 and instructed to select research targets. System proceeds to STEP 26.

**STEP 26-A.** System calculates cost to research contacts for selected companies and produces a price quote. Upon user approval, system proceeds to STEP 27.

**STEP 26-B.** If user does not approve, user has the option to return to Step 25-B to de-select some or all options. When modifications are complete, system proceeds to and repeats Step 26-A and user is subsequently presented with a new price quote. Upon approval of new price quote, system proceeds to Step 27.

**STEP 27.** System processes payment authorization & approval and proceeds to STEP 28.

**STEP 28.** User is given the option to purchase a list of relevant retained and contingency recruiters for selected industries and functional areas.

**STEP 28-A.** If user selects this option, system proceeds to STEP 29. (In one embodiment, the system is linked to third party database(s) capable of providing, among other information, lists of relevant search firm recruiters indexed in a manner that includes but is not limited to functional and industry specialization. In another embodiment, the system's client server database contains and is capable of providing such information.)

**STEP 28-B.** If user does not select this option, the system proceeds to STEP 32.

**STEP 29-A.** System consults client server, retrieves relevant data, calculates cost and produces a price quote for user approval. If user approves, system proceeds to STEP 30.

**STEP 29-B.** If user does not approve, user has the option to return to previous screen to de-select some or all options. When modifications are complete, and user approves price quote, system proceeds to Step 30.

**STEP 30.** Payment authorization and approval takes place. Upon approval, system proceeds to Step 31.

**STEP 31.** System produces **Screen 47** consisting of a list of all relevant recruiters with information including but not limited to appropriate contact, mailing, web addresses and telephone numbers. System proceeds to Step 32.

**STEP 32.** System automatically saves list to a file stored on client server under the user's ID. User is prompted to manually save and down-load final list/database in mail-merge-able database file format to their computer, a floppy disc or other storage medium/device including but not limited to CD-ROM. System proceeds to Step 33.

**STEP 33.** **Screen 48** is presented congratulating the user for completing the process.

**STEP 34. Immediate Post Process Feedback**

System presents **Screen 49** asking for information including but not limited to:  
Problems and or frustrations encountered during the process;  
Perceived helpfulness and value of the process, system capabilities and products;  
What sh/could the system do better?  
What they think the system sh/could do differently?  
Their wish list;  
OTHER.  
System proceeds to Step 34.

**STEP 35. Longer-Term Post Process Feedback**

System presents **Screen 50** asking for permission to follow-up by email and telephone for the purpose of ascertaining information including but not limited to:  
Perceived helpfulness and value of the process, system capabilities and products;  
What was the end result?  
How successful was the end-result?  
What do they wish they'd known before?  
What would they do differently next time?

What they think the system sh/could do differently?  
What sh/could be done better by the system?  
Their wish list;  
OTHER.

**STEP 36. The user has completed the system's process at this point.**

**The system's end-product includes but is not limited to a comprehensive database/mail merge file containing but not limited to the mailing/web addresses, telephone numbers and job function specific contacts for all companies and recruiters, job and resume boards that represent logically appropriate targets for the user's executive search.**

**The system's full service final product includes but is not limited to a database of all information necessary to execute a comprehensive executive search and/or mailing, customized to the user's position profile and specifications and targeted to those industries and companies most likely to provide optimal candidates and receptivity.**

## SCREEN 16

(The chart below illustrates transferability ratings for the marketing function across multiple industries. The job seeker would be instructed to read the chart as follows.)

### How to Read the Industry Transferability Chart for Your Profile:

- 1) Identify your current or the relevant industry on the chart's vertical axis.
- 2) Read across the industry's row horizontally. At each intersection point a transferability rating (from 0 to 3) is given indicating the degree to which your experience is transferable to that industry. A zero (0) rating indicates little to no transfer potential. A three (3) rating indicates greatest and best transfer potential. Transfer potential is rated according to the degree to which the skills and variables employed by the function in each industry are similar.
- 3) Clicking on a given rating will produce an analysis (Screen 17) explaining the reasons for the transferability rating listed for that industry .
- 4) A multi-page analysis for all or multiple specified transferability ratings is available by clicking on the given ratings in which you have an interest (Screen 18.) Select all that are to be included in the multi-page report by clicking on the given rating while holding down the control key, then select FINISH.

(Screen 16 & above-mentioned chart continued below .)

(Job Seeker)  
**SCREEN 17**

(Example of a transferability rating explanation for a user's experience profile relative to a specified industry.)

**Function: Marketing**

**Transfer From: Consumer Package Goods**

**Prospective Industry Transfer To: Consumer Durable Products**

**Transferability Rating: 3**

**Rating Explanation:** Marketers with classical consumer package goods experience have historically enjoyed much success in transferring to the Consumer Durable Products sector. Previously driven by sales and new product development engineering, the sector has become increasingly more competitive and sophisticated. As a result, Consumer Package Goods marketers have been actively sought by the Consumer Durable Products sector for their disciplined and strategic approach to marketing and because the two industries have much in common including similar/same channels of distribution and a manufacturing base.

Consumer Durables marketers enjoy the same degree of line profit and loss responsibility for the products they manage and exercise as much control over all aspects of the marketing mix as their Consumer Package Goods counterparts. The Consumer Durable Products industry offers marketers the same prospects to general management as does Consumer Package Goods.

Consumer Durables companies tend to be more entrepreneurial and fast paced than most Consumer Package Goods environments and offer the added benefit of working more closely with, thus gaining more exposure to, R&D/New Product Development, Sales and the Trade.

Compensation in the Consumer Durable Products industry is comparable to that offered to marketers in the Consumer Package Goods sector.

**(Employer/Recruiter) SCREEN 41**

(The chart below illustrates general transferability parameters for a marketing management search across multiple industries. The user would be instructed to read the chart as follows.)

**How to Read the Industry Transferability Chart for Your Position's Profile:**

- 1) Identify the hiring entity's current industry on the horizontal axis.
- 2) From that point on the horizontal axis, read down the column below it. At each intersection point of the hiring entity's industry and another industry a transferability rating (0 to 3) is given indicating the degree to which experience in that industry is transferable to the hiring entity's industry. A zero (0) rating indicates little to no transfer potential. A three (3) rating indicates greatest and best transfer potential.
- 3) Clicking on a rating will produce an analysis (Screen 42) explaining the reasons for the transferability rating given.
- 4) A multi-page analysis for all or specified transferability ratings is available by clicking on the appropriate selections as indicated (Screen 43.) Select all industries to be included in the report by holding down the control key while clicking on the applicable industry columns. Select FINISH upon completion.

(Screen 41 & above-mentioned chart continued below.)

SCREEN 42

Explanation of transferability rating for a particular function relative to a specified industry.

FUNCTION: Marketing  
HIRING INDUSTRY: Consumer Products - Durables  
PROSPECTIVE TARGET INDUSTRY: Consumer Package Goods  
TRANSFERABILITY RATING: 3

Rating Explanation: Classical consumer package goods experienced marketers have historically enjoyed much success in transferring to the Consumer Durable Products sector. An industry previously driven by sales and new product development/engineering, the Consumer Durable Products sector has become more sophisticated due to increased competition. As a result, Consumer Package Goods marketers, particularly those with engineering exposure and/or undergraduate degrees, have been actively recruited by Consumer Durable Products companies for their sophisticated understanding of consumers and strategic approach to marketing. Skills transfer between the two industries is relatively assured because the two industries have much in common including similar/same target audiences, channels of distribution and a manufacturing base.

Consumer Durable Products and Packaged Goods marketers enjoy relatively the same degree of line profit and loss responsibility for the products they manage and exercise similar control over all aspects of the marketing mix. The Consumer Durable Products sector offers Consumer Package Goods marketing professionals the same autonomy and prospects to general management. Consumer Durables companies tend to be more entrepreneurial and fast paced than most Consumer Package Goods companies, necessitating screening for those Consumer Package Goods marketers with more entrepreneurial experience and less of a process orientation. Consumer Durable Products companies generally offer general management oriented marketers the benefit of being more closely involved with R&D/New Product Development, Engineering and Sales. Compensation in the Consumer Durable Products sector is comparable to that offered in Consumer Package Goods.

Longer-Term Post Process Feedback

System asks for permission to follow-up by email and telephone for the purpose of ascertaining information including but not limited to:

- Perceived helpfulness and value of the process, system capabilities and end product(s)?
- What was the end result?
- How successful was the end-result?
- What do they wish they'd known before?
- What would they do differently next time?
- What sh/could the system do differently?
- What sh/could the system do better?
- A wish list.
- (OTHER)
